

Avoiding Danger-REALTOR Safety Tips

Safety at the Office

Tip 1

Keep your windows and counter clear. Robbers and attackers like to work in private and police like to see in.

Tip 2

Keep a radio or TV playing fairly loudly in the back room when you're alone in the office.

Tip 3

Secure all unused doors and windows, especially if they are in the rear of the office and out of sight and ear shot.

Awareness.

The key to staying safe.
